Subject: Re: Map Showing Madison's Drinking Water Well and the Madison-Kipp Facility

Hi Jennifer,

Thank you for trying to get help from WECAB with our ground water modeling. We have a tentative date of October 11th to discuss the new findings with the WDNR RCRA program. If it's possible, having the modeling available by that date would help with our discussion. This is short notice and we understand if it's not doable.

- Ken

Subject: FW: Map Showing Madison's Drinking Water Well and the Madison-Kipp Facility

Hi John and Ken,

My boss, Tom Poy, called WDNR's Drinking Water Program Director today, Steve Elmore. Steve said he is aware of the Facility, but does not know if Madison's wells have been tested. He will be calling the Director of WDNR's RCRA program asking them about this. Tom told me to send him the information below. I will let you know what happens.

Also, is there any other information we can share with WDNR's Drinking Water Program? I don't know if it is necessary because they should be able to get a lot of information from their RCRA program, right?

Finally, Andi Hodaj, the engineer in WECAB that knows VMODFLOW better than me has not called me back yet about running the VMODFLOW program for us. I will let you know if he returns my call today. After today, I am planning be out of the office until Wednesday, but I might have to come to the office tomorrow to take care of some things.

Please let me know if you have any questions and have a good Thursday,
 Jenny

Subject: Map Showing Madison's Drinking Water Well and the Madison-Kipp Facility

Hi Steve,

Tom told me to send you the attached map showing Madison-Kipp's Facility and the location of Madison's drinking water well. Madison's well is in the bottom right corner of the map and you will see that it is about a third of a mile from the Facility. The Facility is treating a PERC plume and has PCB contamination that the data suggests is in the ground water. Thus, we believe Madison's drinking water well should be tested for:

- Tetrachloroethylene

- Trichloroethene
- Dichloroethene
- Vinyl chloride
- PCBs

Please let us know if Madison has tested their wells for this contamination and if they have not, if they are going to do the testing. Also, please let us know the results of the testing.

If you have any questions, please do not hesitate to ask.

Thank you,
Jenny
